

NEW FOR SPRING 2014

ENVS 202 (4 credits): **Introduction to Environmental Studies: Natural Sciences**

This course is an introduction to environmental science, covering a broad array of subjects ranging from biodiversity in the PNW, climate change in the ocean and atmosphere, energy use, and population ecology. Come learn about how scientists study environmental issues and gain fundamental knowledge on what questions scientists at UO are addressing today.

There are no prerequisites and the course meets the science group requirement. This is a great course for students in non-science majors in need of a course for the science group requirement!

Questions? Email Dave Sutherland, dsuth@uoregon.edu
