

Native Plant Nursery Intern

Help Enhance Prairie and Riparian Habitat by Participating in an Internship at the Parks and Open Space Division's Native Plant Nursery!

We are looking for student interns during the spring, summer and fall terms to help plant native seeds, transplant seedlings, care for mature plants, and assist with seed collection and cleaning.

The Native Plant Nursery is located in Alton Baker Park, just across the river from the UO campus. It is easily accessible on foot or bike via the bike/pedestrian bridge that crosses over the Willamette River.

All you need is a strong interest in learning more about native plants, how they help enhance our natural areas, and how to go about growing them to be planted out into City natural areas.

Students interested in the Native Plant Nursery Intern should send a resume and cover letter describing how this internship fits with your educational/career goals to Kelsey Irvine at kelsey.c.irvine@ci.eugene.or.us. For more information please contact Kelsey at 541-228-5349.
